Alfa Laval presents its complete spectrum for water and waste treatment at Aqua Nederland 2017

During the Aqua Nederland exhibition in Gorinchem, 21, 22 & 23 March, Alfa Laval – a leading global provider of solutions and services for water and waste treatment – presents its complete spectrum of innovative and sustainable solutions.

At Alfa Laval's stand no. 288 visitors will get the opportunity to learn more about the company's equipment, engineered solutions and services for water and waste treatment, municipal as well as industrial, that ensure optimal performance and minimized life cycle costs.

Alfa Laval decanter with 2Touch control package

The ground-breaking ALDEC G3 decanter is the result of a rethink of the basic parameters of decanter centrifuge design and performance. ALDEC G3 decanter centrifuges are equipped with a 2Touch control package as standard. This makes it easy to fine-tune and improve productivity throughout the service life of each ALDEC G3 unit.

An ALDEC G3-45 decanter will be present at the stand in combination with a 2Touch control package to demonstrate its pure simplicity!

Multiple benefits:

- Lower power consumption (which also greatly reduces CO2 emissions)
- 10% boost in processing capacity – or drier cake
- Reductions in life cycle costs
- More efficient bio-solids handling
- Better process monitoring and control.

On display is also a wide range of thickening and dewatering solutions for efficient waste reduction in wastewater plants and waterworks as well as equipment and services for heat exchange and heat recovery.

Follow the “Must-See” route

During the show visitors can follow a special “Must-See” route with regard to innovations and developments in the market. By following the sign they will also pass by the Alfa Laval stand to learn more about a maximum product recovery efficiency by minimizing water from the process. With a choice of multiple technologies. And that is unique in The Netherlands. Which products would you like to recover from your wastewater stream? We gladly take on this challenge together with you!!

Let us know if we can welcome you at our stand by giving us a phone call 076- 579 12 00 or send us an email wibo.heijmann@alfalaval.com or Jeroen.vanwijk@alfalaval.com
