Join us at our Alfa Laval Masterclass: Marine Fuels 2020 Challenges

Right now, the Sulphur cap 2020 is on all our minds. What will next year's fuels look like and how do we deal practically with the challenges they pose?

Alfa Laval has been working towards 2020 for years now, and there's still work to be done. We want to advance the fuel line, so that it provides engine protection and promotes energy efficiency even better than today.

Would you like to know more about the impact of the Sulphur cap 2020 on your ships' operation and how to prepare for it? During the **Alfa Laval Masterclass Marine Fuels 2020 Challenges** renowned experts will share ins and outs related to fuel choice, components in use, fuel management and system layouts.

The masterclass will be held in Antwerp (26/11), Rotterdam (27/11) and Delfzijl (28/11). We look forward to welcoming you!

Sincerely yours,

Alfa Laval Benelux Marine Team

Please register by 15th November at the latest at
www.alfalaval.nl/marinefuels2020

Alfa Laval is uniquely prepared to move you forward, building on a century of fuel treatment experience and key solutions for every aspect of fuel handling. From protecting your engine to safeguarding your compliance and energy efficiency, we'll see that you meet challenges of 2020 – and beyond.
