

Realize your full potential

Global training centres for marine and engine power equipment

Making sure your people know how to get the most out of your Alfa Laval equipment reduces costs, maximizes uptime, minimizes the environmental impact of your operations, and ensures a safe working environment.

Where skills and knowledge empower

Uptime depends on expertise

Safety, compliance, efficiency and reliability

When you buy Alfa Laval equipment, you buy peace of mind. But you must also rely on your equipment operators to get the job done. That's why competence development is invaluable to your everyday operations.

You need to be sure the people who work with Alfa Laval marine and engine power equipment are knowledgeable. Effective training will give them a broad understanding of how to use and maintain the systems, as well as the practical skills to do so – ensuring high efficiency, correct operation and the performance you count on.

Whether at our global training centres, at your facility or power plant, aboard your ship, or at your convenience online, Alfa Laval provides the training you need to get the job done right.

What's in it for you?

- Increased safety and equipment reliability
- Reduced operating and maintenance costs
- Compliance with regulatory requirements
- Longer equipment lifetime
- More confident and competent operators

Expert training

Toward safer, more efficient and fully compliant operations

The success of your business depends on the abilities of your operators. Empower your people through

expert training from Alfa Laval. Alfa Laval training ensures that your operators know how to handle equipment safely, efficiently and in compliance with environmental regulations.

Choose from a range of training programs that provide the flexibility and convenience for people to learn at their own pace. Or combine them to meet your requirements.

Global training centres

Put theory into practice by running Alfa Laval equipment while doing hands-on exercises that enhance your learning experience.

Training takes place in various locations, such as in modern training centres in Stockholm, Mumbai, Manila and Houston. To ensure regulatory compliance, specialized training for Alfa Laval PureBallast is available at all of these training centres.

Standard training

Give your staff the opportunity to take selected courses at various locations worldwide or at global training centres.

People have opportunity to exchange experience with peers, gain insights and share best practices.

Customized training

Whether on board your ship or at your power plant facility, Alfa Laval experts provide basic or advanced training tailored to your needs. Training can, for example, take place in conjunction with commissioning.

Alfa Laval can also offer customized training at your site or at an Alfa Laval office near you.

Digital training

Maximize return on equipment investment with instructor-led training videos, e-learning and training simulators, which are available for selected Alfa Laval equipment.

Online learning makes it possible to combine professional development with a busy work schedule. With Alfa Laval digital learning, you schedule training whenever and wherever it suits you best.

For more details, contact your local sales company or check out www.alfalaval.com/marine-training.

Stockholm, Sweden: Learn how to improve safety and take control of operations.

Mumbai, India: Ensure top performance through hands-on experience combined with theory.

Manila, Philippines: Gain confidence to increase efficiency and uptime and reduce costs.

Houston, Texas, USA: Get the PureBallast training you need to ensure compliance.

Highly qualified instructors

Learn from the experts

Knowledge transfer isn't easy. Some of the best experts do not necessarily have the skills to be good instructors. Fortunately, Alfa Laval experts do.

It takes a special type of person to be an Alfa Laval instructor. Ours are friendly, easy to approach and thoroughly knowledgeable. Their understanding of the marine and engine power industry and of Alfa Laval products is vast.

Our instructors are good communicators, great listeners and dedicated educators. Most have been supporting and training Alfa Laval equipment operators for more than 10 years. They thrive on sharing knowledge and best practices with others. Some even have a wicked sense of humor, which livens up the learning experience.

What people are saying

“Practical experience, expert help and advice, excellent overall explanation of principles.”

– Carnival UK

“Very well organized, detailed understanding of principles, components, operation and maintenance provided. This has enriched my knowledge of the contents covered.”

– Seaspan

“Good know-how of the lecturer — practical experience and field experience.”

– Wärtsilä

Alfa Laval in brief

Alfa Laval is a leading global provider of specialized products and engineered solutions.

Our equipment, systems and services are dedicated to helping customers to optimize the performance of their processes. Time and time again.

We help our customers to heat, cool, separate and transport products such as oil, water, chemicals, beverages, foodstuff, starch and pharmaceuticals.

Our worldwide organization works closely with customers in almost 100 countries to help them stay ahead.
